Templates installation instructions

Once you have downloaded the template package, you are ready to install it.

Make sure to close your Toon Boom product before you start the installation process.

To install the templates package:
1. Download the templates package and unzip it in a place where you plan to keep it. Avoid keeping it on your desktop as you will be linking these files to your Toon Boom product. If ever these files are then moved or deleted, the link will become broken.
2. Open or create a new project.
3. In the Library view, right-click in the left section of the library and select Open Library.
4. Browse for the new templates package you downloaded and access the folder.
5. Select the template folder.
6. Click on the Open button.
